

AMI CONTINENTAL JUKEBOX

Thousands of music videos. Hundreds of artists. The AMI Continental gives you a compelling music video experience with sleek, unmistakable style. Patrons can choose standard audio-only play or upgrade their song selection with a music video.

It's more entertainment for patrons and more revenue for your location.

HOW DOES IT WORK?

The AMI Continental stores up to 300 albums locally, with on-demand access to over a million more songs online. An additional terabyte hard drive allows the jukebox to deliver thousands of music videos from the '80s, '90s, 2000s, and today.

- Patrons can choose to hear audio-only performances or, for an additional credit, upgrade their song choice with an accompanying music video
- A distinct icon marks songs with available videos in search results and other menus
- Patrons can browse top videos on the AMI network or choose from local favorites
- Fully compatible with the AMI BarLink mobile app
- Videos play on the Continental's TV (not included)
- A hard-wired broadband internet connection is required
- Enable the Video Caching feature to allow automatic downloads of the latest video content

WHAT COMES STANDARD?

The AMI Continental is comprised of a main cabinet, three display panels, a VESA mount bracket, and a wall mount bracket. See reverse side for image.

- Main Cabinet houses an ICEpower® 500-watt amplifier and a 4-channel pre-amplifier, as well as the Core Computer Package
- Upper Display Panel promotes the availability of music videos
- Middle Display Panel houses a camera and microphone for possible future applications
- UI Display Panel houses a 24" horizontal touchscreen, credit card reader, and dual MEI bill acceptors (700 stackers)
- Wireless IR remote included

Max Weight: 80 pounds

MORE THAN JUST GREAT MUSIC

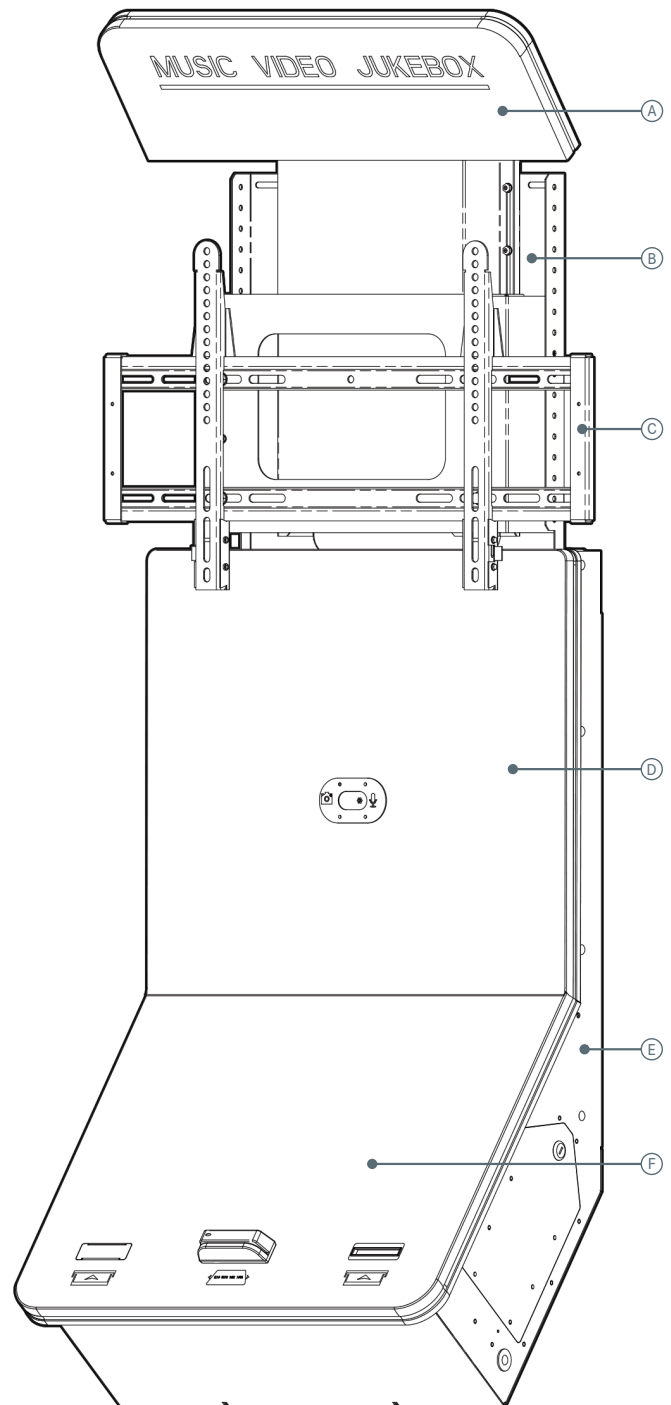

- Connect customers of all ages with the artists and genres they love the most - all searchable through a simple and straightforward menu.
- Offer patrons access to **over a million songs** stored online, or block the display of artists, songs, or genres that aren't quite right for your location.
- Change the default language preference from English to Spanish and tap into AMI's robust collection of Latin American music.
- Use **AMI Ad Manager** to build and schedule your very own ads that display on the jukebox. Choose from one of our ready-made templates or upload an image you've already designed.
- Get peace of mind with **unbeatable 24/7 tech support**. AMI's friendly and knowledgeable staff can resolve many issues right over the phone.

THIS JUKEBOX MEANS BUSINESS

AMI Ad Manager lets you transform the screens of your Continental Jukebox into powerful digital signage. Whether you're promoting what's happening right now or what's coming up soon, there are hundreds of ways to put AMI Ad Manager to work for your business.

- Promote your own products and services - advertise a rewards program, gift cards, seasonal discounts, upcoming events, and more.
- Promote daily and nightly specials! With AMI Ad Manager you can schedule promotions in advance by selecting the times and dates your ads will display on the jukebox.
- Use AMI Ad Manager in combination with **Free Play Mode** - a pay-by-the-hour service for venues that allows patrons to play music free of charge. Schedule and promote "free jukebox nights" in lieu of karaoke or a DJ.
- Build your online following - promote your Facebook, Twitter, and other social media pages using AMI Ad Manager's suite of social media templates.
- AMI Ad Manager offers more than 1,300 custom templates to choose from - with everything from general announcements & seasonal promotions to food, wine, and beer lists.
